Electric Trolley Hitachi

Product information

Hitachi Electric trolleys are fitted with Guide Rollers as standard to reduce wear and ensure suitability for curved beam applications. Key Features - This can be combined with a 4-point or 6-point pushbutton and used as a motorized trolley or overhead traveling crane. - The electric chain hoist with chain driven trolley is suitable for relatively heavy loads not transported a long distance. - The electric chain hoist with manual driven trolley is suitable for relatively light loads transported a short distance.
