Self-Locking Hook SLS POWERTEX (slide-bearing swivel)

Product information

The POWERTEX G10 Self-Locking Hook SLS with Slide-Bearing Swivel is a Grade 100 lifting hook designed for chain sling assemblies where a secure connection to the load and easy hook positioning are required. The automatic self-locking mechanism closes and locks when the hook is loaded, while the rear release lever allows controlled opening during load attachment and removal. The slide-bearing swivel eye rotates when the hook is unloaded, making it easier to position the hook before lifting.

Available for chain sizes from 6 mm to 20 mm with WLLs from 1.4 t to 16 t.

Also available with a ball-bearing swivel as the POWERTEX G10 Self-Locking Hook SLS-B.

Best used for

- Chain sling assemblies requiring a self-locking hook with a swiveling eye for easy positioning before lifting.

Not ideal for

- Applications requiring continuous hook rotation under load. Choose the POWERTEX G10 Self-Locking Hook SLS-B with ball-bearing swivel instead.

Product benefits

- Automatic self-locking mechanism secures the load during lifting.
- Rear release lever allows controlled opening for load attachment and removal.
- Slide-bearing swivel eye rotates when unloaded for easier hook positioning.
- Grade 100 design offers 25% higher WLL than traditional Grade 80 components.
- Conforms to EN 1677 Parts 1, 2, 3 and 4 with a 25% higher WLL.
- Every forged component is crack detection tested. Production samples are proof-load tested, and the design is factory type tested.
