Self-Locking Hook SLS-B POWERTEX (ball-bearing swivel)

Product information

The POWERTEX G10 Self-Locking Hook SLS-B with Ball-Bearing Swivel is a Grade 100 lifting hook designed for chain sling assemblies where a secure connection and free hook rotation are required. The automatic self-locking mechanism closes and locks when the hook is loaded, while the rear release lever allows controlled opening during load attachment and removal. The ball-bearing swivel eye rotates both loaded and unloaded, helping maintain the correct hook orientation throughout the lift.

Available for chain sizes from 6 mm to 26 mm with WLLs from 1.4 t to 26.5 t.

Also available with a slide-bearing swivel as the POWERTEX G10 Self-Locking Hook SLS.

Best used for

- Chain sling assemblies requiring a self-locking hook with continuous swivel rotation under load

Not ideal for

- Applications where hook rotation under load is not required. Choose the POWERTEX G10 Self-Locking Hook SLS with slide-bearing swivel instead.

Product benefits

- Automatic self-locking mechanism secures the load during lifting.
- Rear release lever allows controlled opening for load attachment and removal.
- Ball-bearing swivel eye rotates freely both loaded and unloaded.
- Helps maintain correct hook orientation during lifting operations.
- Grade 100 design offers 25% higher WLL than traditional Grade 80 components.
- Conforms to EN 1677 Parts 1, 2, 3 and 4 with a 25% higher WLL.
- Every forged component is crack detection tested. Production samp
