Carabiner Screw-Lock OXAN Gold, Petzl

Product information

OXAN is a high-strength steel carabiner for setting up anchors or for connecting to metal structures. OXAN can be used with the CAPTIV bar to favor positioning of the carabiner along the major axis, to limit the risk of it flipping and to keep it integrated with the device.

- High-strength steel carabiner, particularly suitable for setting up anchors or for connecting to metal structures
- Oval symmetrical shape allows optimal positioning of the carabiner
- Can be used with a CAPTIV positioning bar to promote loading of the carabiner on the major axis, to keep it integrated with the device and to limit the risk of rotation
- Easier handling:
  - Fluid interior design limits the risk of having a catch point and facilitates rotation of the carabiner
  - Keylock system to avoid any involuntary snagging of the carabiner
- H-shaped cross-section:
  - Ensures an optimal strength/weight ratio
  - Protects markings from abrasion

Major Axis Strength: 38 kN
Minor Axis Strength: 16 kN
Open Gate Strength: 15 kN

Material: Steel
Marking: According to standard, CE-marked, UKCA-marked
Temperature range: -40°C up to +80°C
Standard: EN 362
