Fall Arrest Block Miller® Turbolite™ with SS TAK Ends

Product information

NO PICTURE

TurboLite™ is a small, light and fully compliant retractable personal Fall Arrest Block designed to be used as a personal fall limiter arresting free fall within millimetres.

- Its retractable technology prevents trip hazards while its build in swivel also prevents lifeline twisting.
- The TurboLite™ is extremely compact and light-weight.
- It provides 2m working capacity lifeline which attaches directly to the harness back D-ring for greater mobility and versatility.
- The high strength, impact-resistant nylon housing and engineered Hi-Tech Polyester/Vectran Webbing provide more resistance to abrasion, increasing durability.
- The TurboLite™ eliminates the need for different fall protection equipment to address fall clearance and reduces risk as workers will always be using the proper equipment when fall clearance changes.
- The TurboLite™ can also be used in horizontal and foot level applications where an overhead anchorage point is unacailable (please read supplementary instructions on horizontal usage).

The TurboLite™ has a Stainless Steel Karabiner on each end.
