

Fall Arrest Block Spanset Saverline SRL STU P W 7 STA

Product information

The Saverline - SRL STU P W 7 STA, plastic housed fall arrest block is a sturdy, low maintenance device fitted with a webbing lifeline. The attachment anchorage point on the fall arrest block is a cast aluminium swivel eye $\varnothing 16\text{mm}$, suitable for connection via a standard karabiner type connector, or a standard karabiner type connector with an anchorage sling. The lifeline in this fall arrest block has been tested in a simulated fall over an edge as described in CNB/P/11.060. However, not all edges will react in the same way as the tested steel edge, so when using this fall arrest block, every effort must be made to ensure that in the event of an arrested fall, the lifeline does not pass over an edge.
