Silver Rope (Polyethylene)

Product information

Silver ropes are manufactured using a special Polyethylene (PE) extrusion process which gives the rope superior strength and a distinctive hairy appearance which enhances wear resistance and knotting performance. Silver rope is strong and versatile with excellent handling properties. Ideally suited to general and industrial applications, particularly in the marine industries where high resistance to abrasion and floating buoyancy are advantageous.

Features:

- Superior strength
- Wear and abrasion resistant
- UV stabilized with excellent weathering properties
- Surface characteristics provide excellent knotting and handeling properties
- Floats
- Not affected by water
- Resistant to fungal attack
