

Superflex Strops

Product information

Superflex Strops are slings made especially as chokers. They are designed to choke onto and safely lift things like poles and piles, steel bars, drill rods and bundles of tube. They are very versatile slings with great gripping power and can often solve lifting problems. Various versions are available. Unless otherwise specified all slings are fitted with aluminium alloy ferrules. Steel ferrules can be supplied up to 32mm on request.

Safety factor: 5:1
