

Lifting Eye RUD ACP-TURNADO with variable length

Product information

The ACP-TURNADO is a smart lifting point with a metric thread and variable thread length, supplied with a locknut and washer for flexible installation. Its innovative design supports safer and more efficient lifting by improving load alignment, simplifying inspections, and helping reduce the risk of incorrect positioning during lifting operations.

Best used for:

- Lifting applications requiring a metric thread.
- Industrial environments where frequent inspections and traceability are important.

Product benefits:

- Innovative spring mechanism helps prevent lift bail jamming under transverse loading.
- Swivel joint in the lifting ring axis improves load alignment during lifting.
- Wear lenses enable quick visual inspection of discard criteria.
- Integrated RFID transponder simplifies inspections and asset identification [... Read more](#)

Safety factor: 4:1
