

Chain Block W5 with Load Limit Switch

Product information

W5 series manually operated chain blocks with overload protection are used for general hoisting operation such as mining, construction, industrial lifting and domestic applications. The overload protection is an added feature on these chain blocks protecting users and the unit itself. Other colors and height of lift available upon request.

Features:

- Standard height of lift is 3 and 6 metre. Other height of lift available upon request.
 - Manufactured for ease of operation, and light weight in design.
 - Robust, durable and compact in construction.
 - All blocks come with ball bearing swivel hook.
 - Individually serial numbered with test certificate and instruction manual supplied.
- Overload protection for added safety
