Superclamp AC1-AC4

Product information

This SUPERCLAMP product is an Adjustable Angle Section Clamp. It serves as an anchor or lifting point when attached to an overhead steel angle section approved for lifting applications. The V-Block clamping jaw ensures that the clamp is securely fixed to the angle section when adequately tightened.

These clamps are designed for safety and versatility – each model being suitable to accommodate a wide range of steel angle sections. No tools required as the adjusting mechanism is an integral part of the design features, and incorporates an adjusting bar with handle.

Can be used up to 15 degrees without loss of work load.
