

Magnetic Lifters Pacific

Product information

Pacific Magnetic Lifters can be used in various industries for the lifting and moving of steel, engine parts, semi-manufactured goods and moulds.

Due to its magnetic force, there is no need to use slings, clamps or other holding devices. This will eliminate the chance of damaging the lifted materials.

Features:

- The magnetic lifter features a breakaway force 3.5 times greater than the working load limit.
- Weight capacities are available from 100kg to 6000kg.
- No electricity needed which will increase product safety. Once operated there is less than 1% residual magnetism.
- The simple switch and safety button design allows for one handed operation.
- Use of plate with high-carbon content will reduce the absorbability to less than 50% of rated capacity. Use of plate with high carbon content is not recommended.
