Container Net

Product information

Ropes of polypropylen.

Design: The meshes is manufactured by rope with the diameter 1 alt. 3 mm, 8 mm rope will be used to the frame. The net is provided with attachment eyes in each corner.

... *Read more*

Material: Polypropylen, resistant to rot and most acids and alkalies. The fibre does not absorb water and is UV-stabilized against sunlight.
Note: As a result of the low specific gravity the polypropylen products float.
