# Miners Belt 3M™ E100-0051

## Product information

Restraint D-ring

DBI-SALA's diverse range of belts have been designed to be both functional and adaptable while maintaining a high level of comfort and mobility. Belts are typically used in situations where the need for work positioning and/or restraint arises. They are an important and integral tool of the miner for use with battery packs and self rescuers. A lightweight comfort waist belt provides support, the battery and self rescue straps provide secure attachment of essential tools and the reflective tape provides added visibility and safety.

- Adjustable waist belt with snap hook and D-ring closure buckle
- Reflective tape on rear
- Durable corrosion resistant construction
- Padded waist pad
